

# FAB FUNKY

WEST SUSSEX

UNITED KINGDOM

I'm a self-taught artist and a HUGE animal lover and currently live with four big dogs, and my husband, right by the sea in West Sussex on the south coast of the UK. I've had the privilege of living with many animals during my lifetime and have learned to appreciate all of their unique personalities and funny little quirks, and it's this that inspires my artwork. Here in my FabFunky shop I print my images onto antiquarian book pages. I'm a huge book lover, especially reference books, and so sometimes I end up reading the pages I'm supposed to be printing on! These are genuine pages from the 1800's and so they are steeped in history. And of course I'm a lover of the absurd and whimsical which I think comes across in my artworks. Sometimes it takes the direction of an amusing image, but other times I like to give my animals an elegance, often inspired by the Regency and Victorian eras.
